

THE ART OF ANTICIPATION

Surfing the Waves of Change in your Future with The MERLIN Project©

In a world where **timing** often spells the difference between success and failure, **The MERLIN Project®** gives you a hedge on the Future. Think of it as a high-tech crystal ball, through which you can glimpse upcoming periods of intense activity or rest that indicate the **best (and worst) times** for launching projects, initiating and sealing business deals, getting married, scheduling non-emergency surgery, moving, taking on a new job -- in short, **when** to deal with major life changes, **well in advance of their actual occurrence.**

MERLIN combines the exactness of planetary mathematics with recognized historical cycles to create **snapshots of time** by using a single, "frozen moment" of time as a starting point. The resulting chronographs, called "**Timetraks®**" are highly individualized patterns, tracings in time that begin when we are born or a key ("genesis") event occurs. These **Timetraks®** depict chains of activity that are twofold: **external** factors (career matters, where we work or live) and **internal** factors (health, relationships, emotional concerns.) MERLIN pinpoints three elements about such periods of activity: the **onset**, the **intensity**, and the **duration** and the technology is equally applicable to **people, companies, situations and countries.** (Source: CNN, NBC, NPR)

While relating celestial movements to human events has long been a controversial subject, **MERLIN's** track record of timely and accurate **predictions** speaks for itself. Notable **forecasting successes** include: the acquittal of **O.J. Simpson**, the scandals of the **Bill Clinton** presidency and the Presidential bid of **Bob Dole**, **Leno's** underdog triumph over **Letterman**, the emergence of **JFK Jr.**, the demise of **National Health Care**, the **Republican Revolution of 1994**, the timetable for the breakup of the **Soviet Union**, the follies of the second Bush Administration, including the duration and chaotic aftermath of both the **Gulf** and **Iraq Wars**, the continued survival of **Saddam Hussein** and **Osama Bin Laden**, the resurgence of **John Kerry** and the failed Presidential bid of **Howard Dean** and many other timely events.

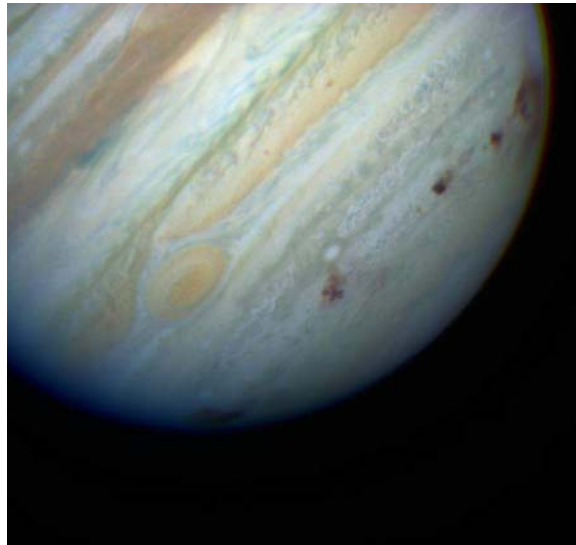

In 1995, the **MERLIN** creators were approached by a Strategic Planning Office of the Pentagon's Joint **Chiefs of Staff** and asked to provide a long-range forecast and timetable for potential incidents of domestic terrorism over the following seven years. This "**white paper**" which was submitted in July 1995, included indications of a significant threat culminating in the Fall of 2001, which we now know to be the **9/11** attack on **the World Trade Center** and **The Pentagon**.

Overall, **MERLIN's** accuracy has approached **80 percent**. In one controlled experiment coordinated by a group of **GE(nie®)** scientists and skeptics, **MERLIN** assigned accident dates to their respective victims with an accuracy rate that **outperformed** chance odds by a whopping 30,000 to 1.

First conceived in **1989**, the **MERLIN Project®** came to national attention in 1991 when the **NBC Nightly News** broke the story of **MERLIN's** uncanny prediction of the stock market plunge in November of that year. Subsequently, **MERLIN** has been featured in magazines and newspapers around the world and its creators have been regular guests on CNN's **Larry King LIVE**, **TalkBack LIVE** and on 'Coast-to-Coast AM with **George Noory**' in recent years.

In an upcoming book, **MERLIN** will not only document its own successes and make new **predictions** for coming years, but it will also provide readers with several related tools, **enabling them to make their own personal forecasts**. Among the tools immediately accessible will be a **MERLIN Year-at-a-Glance®** calendar highlighting days in the coming year best suited for initiating projects, etc. A more extensive **MERLIN Book-of-Days®** provides the reader with a ten-year chronograph of activity that originates on each day of the coming year. An easy to follow guide is included which alerts readers to specific days likely to be favorable or troublesome for them. The book employs the easily understood example of waves and surfing to clearly explain **how to use MERLIN**.

Besides providing readers with highly customized personal timing tools, **MERLIN** will also present a clear conceptual framework which for the first time will provide a firm foundation for "legitimizing" traditional predictive systems like astrology. At the same time **MERLIN** will lay the groundwork for an entirely new 21st century science of **pattern, information, intelligence and consciousness** unlike anything which currently exists; a science as revolutionary as quantum physics and as far reaching in its impact.

There will be **options** available for readers to contact **The MERLIN Project®** directly for highly specific, personalized **Timetraks®** related to career and personal activities. These **options** will include a nation-wide toll free number, a computer disk or CD-ROM which could accompany the book and beginning in July 2003 direct **INTERNET** access.

Direct spin-offs from the book will include an annualized version of the **MERLIN Book-Of-Days®**. With its highly useful timing information for personal and professional planning, it could easily become a yearly purchase akin to the Information Please or Farmer's Almanac.

About the MERLIN co-founders:

Dr. George Hart is an **SDI (Pentagon) physicist**, who specializes in the application of supercomputers to the mathematical modeling of systems exhibiting extremely complex behavior. In 1992, he received the prestigious **British RANK Prize** for his work in laser technology "for benefiting mankind, especially in eye surgery" (for) **inventing** the excimer laser.

Paul Guercio is a **nationally-respected futurist** and a long-time student of traditional and esoteric predictive systems. His 30 years of research into the **Psychical Sciences** and subsequent collaboration with Dr. Hart directly resulted in the creation of the **MERLIN Project**. His clients include many prominent business people, politicians and celebrities.
